ABOUT ME

A dedicated Web Developer with experience in maintaining and enhancing complex JavaEE-based applications, complemented by a strong background in technical documentation and client consultation. Passionate about software engineering and mentoring, with a proven track record in academic projects and space technology initiatives.

EXPERIENCE

FULL STACK WEB DEV / EUROPEAN DYNAMICS
OCTOBER 2022 – PRESENT

- Maintained a governmental web app written in JavaEE and Spring.
- Invented and wrote several tools and scripts to enhance the user and developer experience in Python.
- Wrote technical and business documentation for various processes of the application and consulted with the client on ways to improve them.

SOFTWARE ENGINEER / BEAM STUDENT GROUP
AUGUST 2020 – PRESENT

- Developed the group's website in Wordpress.
- Implemented a UI for the data analysis subteam to have during the launch of the balloon experiment.
- Led the software team of project DROPSTAR to the launch of its rocket experiment.
- Active mentor for the 4th generation of upcoming experiment.
